email creation

☒ 3pm-6pm

12/05:

--Email Creation Form

13/05:

--CAP landing page normal CSS

14/05:

--She wanted it in tailwindcss so changed it [TO CHANGE]

--made a report of Franchisee Financial Reporting Dashboard

15/05:

--Submitted the CAP landing page using tailwindcss

--made a report of Franchisee Revenue Reporting Tool

16/05:

--made report of

Recruitment Revenue [Did, to check]

{Some issues in the calculations}

Job portal Revenue [to do] {Senior did}

17/05:

--LEAVE

(Sangeet)

19/05:

--Already have 2 forms (joint family and senior citizens)

To add them on the landing page by navigation

--make form for fresher [Did half] of CAP

--made report of LegalContractsReport

20/05:

--remaining form for fresher of CAP

--meeting for Sarthi360 for an hour with the team (Before this Burhan senior, below purna and namrata)

21/05 to 29/05:

--LEAVE

(Performance)

 10am-6pm

30/05:

--WORK ;

DAY 18 31/05:

--WORK ;

02/06:

--job portal report

03/06:

--WORK ;

04/06:

--job portal report updation

05/06:

--franchisee reports that is franchisee details

--and franchisee performance

06/06:

--franchisee reports that is franchisee details

--and franchisee performance updation

07/06: work from home

--Goal setter page

09/06: work from home

--CAP freshInvestor and SeniorCitizen page with backend

10/06:

--Goal setter added transition

--CAP integration of login page also updated the login
--and made signup page [table not made]

11/06:

--WORK ;

12/06:

--projection added tables
--and Growbit business Entity with backend

13/06:

--job invoice form and invoice data updation

16/06:

--goal setter updation made it dynamic
the goals would be fetched from master data
--meeting for Sarthi360 :
Now will work in investment portfolio instead of sarthi360
--after lunch meeting for investment portfolio

17/06:

-- goal setter fetching issue solving gave the code
to namrata
-- cap tried to upload in GitHub error
--meet for investment portfolio made me the TL

18/06:

--client report made in alphabetic order
--CAP updation made it dynamic

19/06:

--backend pushed in GitHub
--investment backend deployment in render

20/06 and 21/06: work from home

--deployment error check
--deployed successfully both frontend and backend

22/06: Sunday

-- frontend pages of investment portfolio
in the instrument setup forms of bank, stocks

23/06:

--changed the frontend pages inside instrument setup forms
of commodities, properties, ppf
--checking the register user backend

24/06:

--need to push the changes; instrument setup,
reports, stock dashboard, axis bank dashboard
--backend of business entity

25/06:

--backend of primary member and doshi family

26/06:

--pushed: allInsurance, insuranceDashboard
--checked the routes for login and register
--sir was saying drop the project do in tally instead
then said i want to do in react then again doing this project

27/06:

--changed the backend and frontend for the primary member form

28/06:

--leave 4th sat

30/06:

--meet for caps

--doshi family frontend

--business family frontend

01/07:

--business entity backend added pdf button too

02/07:

--doshi family frontend addition

--doshi family backend doing

--and backend added pdf button too

03/07:

--backend of family form addition

--also the mapping of family member filter

--interviews

04/07:

--Bank account page refinement in frontend form
and validations made

--Bank account backend

--fetched details in the linked bank account page

--fetched details in my bank investment

06/07: Sunday

--Taxation capital gains refinement and backend, fetching

07/07:

--Taxation Gst refinement and backend, fetching

--Taxation Dividend refinement and backend, fetching

08/07:

--Taxation TDS refinement and backend, fetching

--BorrowedFund backend, fetching

--new commodity backend, fetching

--commodity sale backend, fetching

09/07:

--WORK ; TCS resume

10/07:

--WORK ; TCS interview

--Tania sent Comparisonstudy.js

--Nandini sent wrong files that is she made the frontend

for when the user clicks on the submit form button,

also she made for 3 insurances too

--download bank module, download stock module

11/07:

--Taxation Income tax refinement and backend, fetching

12/07:

--Mutual Fund and redemption refinement and backend, fetching

14/07:

--Property all the 3 forms refinement and backend, fetching

15/07:

--Stocks all the 4 backend, fetching

--mutual fund automation

16/07:

--ppf all the 5 backend, fetching

17/07:

--insurance all the 9 backend

18/07:

--fetching all the 9 insurance

--added back button in insurance

--added navigation of record button to fetch page

19/07: work from home

--bank reports check ❌

21/07:

--comparison study backend

--capital gains refinement fetching

--all 4 CAP forms refinement calculation

TO FIX THE URL IN ALL REPORTS

22/07:

--Bank Reports

--Stocks Reports

at home

--Mutual Reports

23/07:

--❌

24/07: work from home (Train)

--Insurance Reports

--Commodities Reports

(To check once)

--Properties Reports

--PPF Reports (also add a back button)

--Taxation Reports (also add a back button)

--Borrowed Reports

25/07 - 09/08 : (Village)

--Only pushed works done by tania, alka, nandini for CAPS

11/08:

--Data to be filled in the investment website ✖

12/08: (Official end date of internship but have to do more 10 days since i was on leave so last date is 22nd aug)

--CAPS Trust fund and senior citizen correction not proper but

13/08: (Asked to do a job portal project 45,000rs)

--CAPS senior citizen form updation

14/08:

--CAPS senior citizen pdf generation ✖

Outline for Job Portal Project

15/08-16/08: Independence, Krishna janamastami

18/08-22/08: heavy rain hence worked from home

--Outline for Job Portal Project

23/08:

--Updation in comparison study and pdf generation comparison study

--Proposal for Job portal

--Stipend for previous and Offer letter for job portal will start from 10th sept

25/08:

--meeting with bankhim and rashesh sir

--pdf generation for the senior citizen

- updated the poster visibility for asking admin request
- admin panel started

16/10/2025

- poster visibility works if changed the status

--admin login

17/10/2025 (after 1pm Diwali office lunch)

--checked admin pages not handled yet to do

18/10/2025 - 25/10/2025 (Diwali leave)

27/10/2025

--sir told no need to hide data since right now not giving to other companies

28/10/2025

--reverted the code removed the poster visibility and admin panel changes in db also

--changes in the post jobs removing the mandatory option of company name and removed the company info altered the db and backend too

29/10/2025

--researched for adding the features email, personalized, admin

30/10/2025

--researched

31/10/2025

--Personalized job recommendations

--automated email

01/11/2025 (Saturday took leave)

03/11/2025

--admin panel skeleton backend frontend database

04/11/2025

--jobs tab skeleton

--admin tab enhancement

05/11/2025

--admin tab enhancement

--admin dashboard added job poster

06/11/2025

--admin access revoke and restore

07/11/2025 (took leave cause of some morcha)

08/11/2025 (Saturday leave)

10/11/2025

--email scheduler changes for the production used OAuth

11/11/2025

--admin deployment

--view analytics backend

--settings backend started

12/11/2025

[meet with rashesh sir 'i can make in 15min']

--settings backend done

--Delete account

--enhanced the jobs relevant jobs will be shown 1st

--saved jobs dynamic and real time

--post jobs para arrangement

--the default data in the profile should not be shown kept it blank instead

13/11/2025

--if the job seeker profile is not filled popup every time they login update your profile

--also routing if new login to /profile

--Login changed added console since the deployed link was not able to by crypt the password for mock poster

--Added user isolation for job seekers also checked message and applications

14/11/2025

--resume text is coming after it is uploaded in 2nd time so changes made

--some download cv is failed since it needs cloud storage

15/11/2025 (Saturday took leave)

17/11/2025

--cloud storage google implementation

--integration in the project

--resume preview download resume text in user profile

--cv in poster section applied gcs

--in jobs section too

18/11/2025

--application re-submitting applied gcs

--application download and preview in poster

--my application preview and download of the resume

--saved candidates adding backend so it fetches the latest URL started the backend and table

19/11/2025

--admin user page updated to delete and filters working

--admin job page updated to delete and filters working

--made 10min expiry of the token

--remember me and forgot password comment out

--resume fetched in the admin

20/11/2025

--resume fetched in the admin enhancement filter

--incomplete profile sent emails for that

21/11/2025 --no work

22/11/2025 (Saturday leave)

24/11/2025 --no work

25/11/2025 () --no work

26/11/2025

--meeting with Bankim sir he said very good -> flow candidates, job posting, franchisee login; to send candidates the email of the site

--in admin creating email sending option for the candidates added csv and excel option too

27/11/2025

--sent 2000 emails approx. through admin to the candidates

--used another email id's for sending (4 in the company name) made the Gmail api for each

28/11/2025

--gmail blocked due to spam and promo emails so made delay in sending

--made 300 per day and 50 per hour

--meeting told good knowledge but time/money oriented does in hurry (soch choti hai)

--registered on zoho recruit for demo

--cybersec team research what work to give

29/11/2025 (Saturday took leave)

01/12/2025 --no work

{ took leave for rehearsal and practice

02/12/2025 interview in ideamagix thane

03/12/2025

04/12/2025

05/12/2025 (took leave for 7th year exam)

06/12/2025 (Saturday leave)

}

08/12/2025 ()

09/12/2025

--Job Portal presentation with all the employer got some suggestions

--candidate search resume will be location/experience/keywords/salary

--during break got to know from purna ki sir bhadak gaye the he was saying that tulsi ka bhi internship hogaya toh chutii something something

10/12/2025 last day of internship:

--Add Skillset in the job post

--Resume upload in word in the profile and changes for download doc in /find-candidate, /applicants, /saved-candidates and also in the admin resume

Completed all the suggestion and everything on time Yesss

11/12/2025

Asked about stipend he told time lagega chilla ke ghar pe puch rahe hai n all i said my bro is also in it he said pura db hone tak tu kya karegi

then again he said don't come from tomorrow come on 18th,19th,20th new hires tell them what all to do stipend tab lelena

18/12/2025

gave zip file to purna ma'am

--footer added links

22/12/2025

they started creating the db by candidate

29/12/2025

testing started

Rupali ma'am called and was saying come to office and was saying the changes will be separate the login and approve job poster logins n all i told you should have said earlier

--separated the login and signup for both logins

30/12/2025

--Resume excel download added fields

--Job poster approval

31/12/2025

google meet with purna

05/12/2025

sent email said Monday will give the stipend

Changes required by Rupali saakshi said by rashesh

06/12/2025

google meet with saakshi and Rupali

08/01/2026

--Job poster login should remain logged in at least for 1 week, unless logout specifically

09/01/2026

--jobs table is missing while recover so created it

--suggestion for selection to select skills in job seeker

11/01/2026

--All options under profile moved to navbar itself

--Added filter of jobs and internships in both active jobs and applications

--removed the top candidate from the poster dashboard

--added feature to send message to all applications

✖ //not done yet TO DO:

billing account verification google cloud

to change 2 steps verification of company Gmail
